```

```
<tr>
<th>Description</th>
<td>
```

Interstellar is a science fiction movie about a group of astronauts

traveling through a wormhole in space to find a new home for humanity.
The movie combines emotional storytelling with advanced scientific concepts.

PART 2 – Website Evaluation

1. Appealing Website

Website URL:

<https://www.apple.com>

a. What is the URL of the website?

<https://www.apple.com>

b. Does this page use tables? If so, for what purpose?

The Apple website does not mainly use tables for layout.
Modern layout techniques such as Flexbox and Grid are used instead.

c. Does this page use CSS? If so, for what purpose?

Yes, the page uses CSS for layout, typography, colors, spacing, animations, responsive design, and overall visual appearance.

d. Is this page appealing or unappealing? List three reasons.

The page is appealing because:

1. The design is clean and modern.
2. The typography and spacing improve readability.
3. The website is responsive and works well on mobile devices.

2. Unappealing Website

Website URL:

<http://www.lingscars.com>

a. What is the URL of the website?

<http://www.lingscars.com>

b. Does this page use tables? If so, for what purpose?

Yes, tables are used for organizing information and parts of the layout.

c. Does this page use CSS? If so, for what purpose?

Yes, CSS is used for colors, text formatting, and page layout.

d. Is this page appealing or unappealing? List three reasons.

The page is unappealing because:

1. There are too many colors and animations.
2. The layout looks crowded and confusing.
3. The page lacks visual consistency and simplicity.

e. If this page is unappealing, what would you do to improve it?

I would simplify the layout, reduce the number of colors and animations, improve spacing, and organize the content more clearly to create a cleaner and more professional design.
